SPRUCE PRODUCTS

Our planed spruce products are versatile and suitable for various construction purposes. Our selection includes CE-marked, strength-graded planks as well as battens in various sizes.

The raw material we use comes from responsibly managed forests (certificate PEFC-COC-FIN-1518).

The strength of wood can be determined based on its density, knot structure, and other structural characteristics.

Our strength grading is carried out visually in accordance with the EN 338 standard. The C24 strength class is the most commonly used grade in construction.

Our product certification for strength grading is handled by Control Union Finland Oy.

PRODUCT RANGE

Strength-Graded Spruce Planks

- 48x98 planed C24
- 48x123 planed C24
- 48x148 planed C24
- 48x173 planed C24
- 48x198 planed C24
- 48x220 planed C24

Battens

- 21x48 planed
- 23x48 planed
- 30x48 planed
- 48x48 planed
